

NEW OIL RANGE

NEW OIL RANGE

Motrio all-makes brand now includes a range of high quality lubricants under the Motrio Oil label

. Available to the independent garage trade through the Renault Trade Centre network, all of the lubricants are thoroughly tested and proven to keep engines cleaner and with many other benefits such as the reduction in sludge build-up, significantly contributing to the life span and enhanced performance of the vehicle.

The European oils sales market is dominated by three SAE classifications: 10W40 (57%), 5W40 (31%) and 15W40 (6%). As a result, Motrio has developed three specific oil products to cater for these classifications: Motiro Super - a mineral based 15W40, Motrio Extra - a semi-synthetic 10W40 and Motrio Super Extra - a fully synthetic 5W40.

All of these oils are suitable for any petrol-engined car, but they can also be used in the vast majority of diesel-engined cars. Each classification is available in one, five, 20 and 208 litre containers, with the 20 litre proving to be very popular and excellent value for money.

The oil products complement Motrio's extensive 'Universal' range of aftermarket consumables, which also includes anti-freeze/coolant, brake fluid and screen wash.

For further information about Motrio oils, or any other product in the all-makes range, please contact your local Renault Trade Centre. Contact: Motrio, 0800 032 2255
